

CITY OF BALTIMORE
Bureau of Maternal and Child Health
Grant Service Specialist
Data Analyst/Programmer
(Two-year Grant Funded)
Salary: \$48,812 - \$59,437 Annually

OPENING DATE: 4/11/2017

CLOSING DATE: 6/01/2017

The Baltimore City Health Department is currently seeking an organized individual to fill the role of Data Analyst/Programmer for the Bureau of Maternal and Child Health. This position is full-time and responsible for a wide variety of data management and analytical tasks, computer programming, and systems design development. Supervision is received from a technical superior. This is a two year, grant funded position.

Some of the duties assigned to this position include:

- Compiles, verifies, manages and reviews data and statistics on City Agency programs for use in proposals, presentations, data projects, and data requests.
- Prepares reports, charts, graphs, basic statistical reports, grant applications and other documents using various analytical techniques
- Writes programs to create user interface to enter, update and delete data and generate reports; develops database designs based on user requirements; uses data models to organize, store and secure data; repairs and compacts databases
- Designs and modifies systems; develops system flow charts, forms, input and output documents and computer files, writes detailed systems specifications and procedures
- Investigates request for electronic data processing systems and programming requirements
- Attends and participates in meetings
- Performs related work as required

Required Knowledge, Skills and Abilities:

- Ability to compile, manage and review data and statistics
- Skill in organizing and analyzing data for statistical reports
- Knowledge of commonly utilized database construction and maintenance
- Ability to conduct systems studies and to collect, organize and analyze data
- Ability to communicate effectively orally and in writing
- Ability to think critically and interpret data

Minimum Education and Experience Requirements

- A Bachelor's degree in informatics (or related degree) and 2-3 years of experience in preparing computer programs, including one year in systems design. Experience in managing data and quantitative/analytical methods preferred.

Recommended: Academic coursework in quantitative/analytical methods. Academic coursework or some experience in public health methods.

Equivalencies: Equivalent combination of education and experience

Licenses, Registrations and Certificates: Not applicable

The salary range for this position is \$48,812 - \$59,437. Benefit package includes: Health, Dental, Paid Holidays and Paid Leave.

Note: Those eligible candidates who are under final consideration for appointment in this position will be required to authorize the release of criminal conviction information and submit to drug and alcohol testing.

Interested candidates should submit a resume and cover letter to:
